EXXON MOBIL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Financial Statement Preparation

These unaudited condensed consolidated financial statements should be read in the context of the consolidated financial statements and notes thereto filed with the Securities and Exchange Commission in the Corporation's 2019 Annual Report on Form 10-K. In the opinion of the Corporation, the information furnished herein reflects all known accruals and adjustments necessary for a fair statement of the results for the periods reported herein. All such adjustments are of a normal recurring nature. Prior data has been reclassified in certain cases to conform to the current presentation basis.

The Corporation's exploration and production activities are accounted for under the "successful efforts" method.

2. Miscellaneous Financial Information

Crude oil, products and merchandise inventories are carried at the lower of current market value or cost, generally determined under the last-in first-out method (LIFO). The Corporation's results for the first quarter of 2020 include a before-tax charge of \$2,777 million, included in "Crude oil and product purchases" on the Statement of Income, from writing down the book value of inventories to their market value at the end of the period. This adjustment, together with a similar adjustment for equity companies included in "Income from equity affiliates," resulted in a \$2,096 million after-tax charge to earnings (excluding noncontrolling interests) and will be re-evaluated at the end of each quarter in 2020. The earnings impact may be adjusted upward or downward this year based on prevailing market prices at the time of future evaluations. At year-end, any required adjustment is considered permanent and is incorporated into the LIFO carrying value of the inventory.

The COVID-19 pandemic resulted in substantial reductions in demand for crude oil, natural gas, and petroleum products. This reduction in demand led to sharp declines in industry prices and considerable volatility in financial markets during the quarter. Based on deteriorating industry conditions and a significant reduction in its market capitalization, the Corporation assessed its goodwill balances and certain asset groups for impairment and recognized after-tax impairment charges of \$787 million. These charges included goodwill impairment of \$562 million in Upstream, Downstream, and Chemical reporting units and other impairment charges of \$225 million, mainly in the Upstream segment. For the goodwill impairment charges, the fair values of the impacted reporting units primarily reflected market-based estimates of historical EBITDA multiples at the end of the quarter. For the other impairment charges, which mainly relate to the Corporation's investment in an Upstream equity company, recent hird party price outlooks, internal estimates of future volumes and costs, and estimates of discount rates for similar properties were used to estimate fair value. The charges related to goodwill impairment are included in "Depreciation and depletion" on the Statement of Income while the charges related to other impairments are largely included in "Income from equity affiliates."

3. Litigation and Other Contingencies

Litigation

A variety of claims have been made against ExxonMobil and certain of its consolidated subsidiaries in a number of pending lawsuits. Management has regular litigation reviews, including updates from corporate and outside counsel, to assess the need for accounting recognition or disclosure of these contingencies. The Corporation accrues an undiscounted liability for those contingencies where the incurrence of a loss is probable and the amount can be reasonably estimated. If a range of amounts can be reasonably estimated and no amount within the range is a better estimate than any other amount, then the minimum of the range is accrued. The Corporation does not record liabilities when the likelihood that the liability has been incurred is probable but the amount cannot be reasonably estimated or when the liability is believed to be only reasonably possible or remote. For contingencies where an unfavorable outcome is reasonably possible and which are significant, the Corporation discloses the nature of the contingency and, where feasible, an estimate of the possible loss. For purposes of our contingency disclosures, "significant" includes matters, as well as other matters which management believes should be disclosed. ExxonMobil will continue to defend itself vigorously in these matters. Based on a consideration of all relevant facts and circumstances, the Corporation does not believe the ultimate outcome of any currently pending lawsuit against ExxonMobil will have a material adverse effect upon the Corporation's operations, financial condition, or financial statements taken as a whole.

Other Contingencies

The Corporation and certain of its consolidated subsidiaries were contingently liable at March 31, 2020, for guarantees relating to notes, loans and performance under contracts. Where guarantees for environmental remediation and other similar matters do not include a stated cap, the amounts reflect management's estimate of the maximum potential exposure. These guarantees are not reasonably likely to have a material effect on the Corporation's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Guarantees

Additionally, the Corporation and its affiliates have numerous long-term sales and purchase commitments in their various business activities, all of which are expected to be fulfilled with no adverse consequences material to the Corporation's operations or financial condition.

1,714

The operations and earnings of the Corporation and its affiliates throughout the world have been, and may in the future be, affected from time to time in varying degree by political developments and laws and regulations, such as forced divestiture of assets; restrictions on production, imports and exports; price controls; tax increases and retroactive tax claims; expropriation of property; cancellation of contract rights and environmental regulations. Both the likelihood of such occurrences and their overall effect upon the Corporation vary greatly from country to country and are not predictable.

In accordance with a Venezuelan nationalization decree issued in February 2007, a subsidiary of the Venezuelan National Oil Company (PdVSA) assumed the operatorship of the Cerro Negro Heavy Oil Project. The decree also required conversion of the Cerro Negro Project into a "mixed enterprise" and an increase in PdVSA's or one of its affiliate's ownership interest in the Project. ExxonMobil refused to accede to the terms proffered by the government, and on June 27, 2007, the government expropriated ExxonMobil's 41.67 percent interest in the Cerro Negro Project.

ExxonMobil collected awards of \$908 million in an arbitration against PdVSA under the rules of the International Chamber of Commerce in respect of an indemnity related to the Cerro Negro Project and \$260 million in an arbitration for compensation due for the La Ceiba Project and for export curtailments at the Cerro Negro Project under rules of International Centre for Settlement of Investment Disputes (ICSID). An ICSID arbitration award relating to the Cerro Negro Project's expropriation (\$1.4 billion) was annulled based on a determination that a prior Tribunal failed to adequately explain why the cap on damages in the indemnity owed by PdVSA did not affect or limit the amount owed for the expropriation of the Cerro Negro Project. ExxonMobil filed a new claim seeking to restore the original award of damages for the Cerro Negro Project with ICSID on September 26, 2018.

The net impact of this matter on the Corporation's consolidated financial results cannot be reasonably estimated. Regardless, the Corporation does not expect the resolution to have a material effect upon the Corporation's operations or financial condition.

An affiliate of ExxonMobil is one of the Contractors under a Production Sharing Contract (PSC) with the Nigerian National Petroleum Corporation (NNPC) covering the Erha block located in the offshore waters of Nigeria. ExxonMobil's affiliate is the operator of the block and owns a 56.25 percent interest under the PSC. The Contractors are in dispute with NNPC regarding NNPC's lifting of crude oil in excess of its entitlement under the terms of the PSC. In accordance with the terms of the PSC, the Contractors initiated arbitration in Abuja, Nigeria, under the Nigerian Arbitration and Conciliation Act. On October 24, 2011, a three-member arbitral Tribunal issued an award upholding the Contractors' position in all material respects and awarding damages to the Contractors jointly in an amount of approximately \$1.8 billion plus \$234 million in accrued interest. The Contractors petitioned a Nigerian federal court for enforcement of the award, and NNPC petitioned the same court to have the award set aside. On May 22, 2012, the court set aside the award. The Contractors appealed that judgment to the Court of Appeal, Abuja Judicial Division. On July 22, 2016, the Court of Appeal upheld the decision of the lower court setting aside the award. On October 21, 2016, the Contractors appealed the decision to the Supreme Court of Nigeria. In June 2013, the Contractors filed a lawsuit against NNPC in the Nigerian federal high court in order to preserve their ability to seek enforcement of the PSC in the courts if necessary. Following dismissal by this court, the Contractors appealed to the Nigerian Court of Appeal in June 2016. In October 2014, the Contractors filed suit in the United States District Court for the Southern District of New York (SDNY) to enforce, if necessary, the arbitration award against NNPC assets residing within that jurisdiction. NNPC moved to dismiss the lawsuit. On September 4, 2019, the SDNY dismissed the Contractors' petition to recognize and enforce the Erha arbitration award. The Contractors filed a no

⁽¹⁾ Included in the Balance Sheet lines: Notes and accounts receivable, less estimated doubtful amounts and Other assets, including intangibles, net

⁽²⁾ Included in the Balance Sheet line: Investments, advances and long-term receivables

⁽³⁾ Included in the Balance Sheet lines: Investments, advances and long-term receivables and Other assets, including intangibles, net

⁽⁴⁾ Included in the Balance Sheet lines: Accounts payable and accrued liabilities and Other long-term obligations

⁽⁵⁾ Excluding finance lease obligations

⁽⁶⁾ Included in the Balance Sheet line: Other long-term obligations

⁽⁷⁾ Advances to/receivables from equity companies and long-term obligations to equity companies are mainly designated as hierarchy level 3 inputs. The fair value is calculated by discounting the remaining obligations by a rate consistent with the credit quality and industry of the company.

The increase in the estimated fair value and book value of long-term debt reflects the Corporation's issuance of \$.5 billion of long-term debt in the first quarter of 2020. The \$8.5 billion of long-term debt is comprised of \$1,500 million of 2.992% notes due in 2025, \$1,000 million of 3.294% notes due in 2027, \$2,000 million of 3.482% notes due in 2030, \$1,250 million of 4.227% notes due in 2040, and \$2,750 million of 4.327% notes due in 2050.

In the first quarter of 2020, the Corporation established a short-term credit facility to provide an additional \$7.0 billion of borrowing capacity for general corporate purposes to supplement its existing short-term revolving credit facilities of \$7.9 billion as of year-end 2019. The majority of these credit facilities will expire within one year. As of March 31, 2020, no material amounts have been drawn on these facilities.

Subsequent Event. On April 15, 2020, the Corporation issued \$9.5 billion of long-term debt. The \$9.5 billion of long-term debt is comprised of \$2,750 million of 1.571% notes due in 2023, \$1,250 million of 2.992% notes due in 2025, \$2,000 million of 2.610% notes due in 2030, \$750 million of 4.227% notes due in 2040, and \$2,750 million of 3.452% notes due in 2051. Net cash proceeds were \$9.6 billion reflecting two tranches that were issued at a premium. This transaction was not reflected in the consolidated financial statements as of March 31, 2020.

Derivative Instruments. The Corporation's size, strong capital structure, geographic diversity and the complementary nature of the Upstream, Downstream and Chemical businesses reduce the Corporation's enterprise-wide risk from changes in commodity prices, currency rates and interest rates. In addition, the Corporation uses commodity-based contracts, including derivatives, to manage commodity price risk and for trading purposes. Commodity contracts held for trading purposes are presented in the Consolidated Statement of Income on a net basis in the line "Sales and other operating revenue." The Corporation's commodity derivatives are not accounted for under hedge accounting. At times, the Corporation also enters into currency and interest rate derivatives, none of which are material to the Corporation's financial position as of March 31, 2020, and December 31, 2019, or results of operations for the periods ended March 31, 2020 and 2019.

Credit risk associated with the Corporation's derivative position is mitigated by several factors, including the use of derivative clearing exchanges and the quality of and financial limits placed on derivative counterparties. The Corporation maintains a system of controls that includes the authorization, reporting and monitoring of derivative activity.

At March 31, 2020, the net notional long/(short) position of derivative instruments was (4) million barrels for crude oil, (36) million barrels for products, and (192) million MMBtus of natural gas. At December 31, 2019, the net notional long/(short) position of derivative instruments was 57 million barrels for crude oil, (38) million barrels for products, and (165) million MMBtus of natural gas.

Realized and unrealized gains/(losses) on derivative instruments that were recognized in the Consolidated Statement of Income are included in the following lines on a before-tax basis:

9. Leases

A previously recorded operating lease was renegotiated in the first quarter of 2020 and the new agreement no longer meets the definition of a lease. At year-end 2019, this agreement had been reported as a right of use asset of \$1.3 billion and a lease liability of \$1.3 billion in the "Other" operating lease category. The new agreement will be reported as a take-or-pay obligation.

⁽¹⁾ Revenue is determined by primary country of operations. Excludes certain sales and other operating revenues in Non-U.S. operations where attribution to a specific country is not practicable.

10. Allowance for Current Expected Credit Loss (CECL)

Effective January 1, 2020, the Corporation adopted the Financial Accounting Standards Board's update, *Financial Instruments – Credit Losses (Topic 326)*, as amended. The standard requires a valuation allowance for credit losses be recognized for certain financial assets that reflects the current expected credit loss over the asset's contractual life. The valuation allowance considers the risk of loss, even if remote, and considers past events, current conditions and reasonable and supportable forecasts. The standard requires this expected loss methodology for trade receivables, certain other financial assets and off-balance sheet credit exposures. The cumulative effect adjustment related to the adoption of this standard reduced equity by \$93 million.

The Corporation is exposed to credit losses primarily through sales of petroleum products, crude oil, NGLs and natural gas, as well as loans to equity companies and joint venture receivables. A counterparty's ability to pay is assessed through a credit review process that considers payment terms, the counterparty's established credit rating or the Corporation's assessment of the counterparty's credit worthiness, contract terms, country of operation, and other risks. The Corporation can require prepayment or collateral to mitigate certain credit risks.

The Corporation groups financial assets into portfolios that share similar risk characteristics for purposes of determining the allowance for credit losses. Each reporting period, the Corporation assesses whether a significant change in the risk of credit loss has occurred. Among the quantitative and qualitative factors considered are historical financial data, current conditions, industry and country risk, current credit ratings and the quality of third-party guarantees secured from the counterparty. Financial assets are written off in whole, or in part, when practical recovery efforts have been exhausted and no reasonable expectation of recovery exists. Subsequent recoveries of amounts previously written off are recognized in earnings. The Corporation manages receivable portfolios using past due balances as a key credit quality indicator.

The Corporation recognizes a credit allowance for off-balance sheet credit exposures as a liability on the balance sheet, separate from the allowance for credit losses related to recognized financial assets. Among these exposures are unfunded loans to equity companies and financial guarantees that cannot be cancelled unilaterally by the Corporation.

During the first quarter of 2020, the COVID-19 pandemic spread rapidly through most areas of the world resulting in economic uncertainty, global financial market volatility, and negative effects in the credit markets. The Corporation has considered these effects, along with the significantly lower balances of trade receivables at the end of the quarter, in its estimate of credit losses and concluded no material adjustment to credit allowances in the quarter was required. At March 31, 2020, the Corporation's evaluation of financial assets under *Financial Instruments – Credit Losses (Topic 326)*, as amended, included \$17,740 million of notes and accounts receivable, net of allowances of \$148 million, and \$9,211 million of loans and long-term receivables, net of allowances of \$441 million, and certain other financial assets where there is immaterial risk of loss.

Earnings (Loss) per common share - assuming dilution(dollars)	(0.14)	0.55

References in this discussion to Corporate earnings (loss) mean net income (loss) attributable to ExxonMobil (U.S. GAAP) from the consolidated income statement. Unless otherwise indicated, references to earnings (loss), Upstream, Downstream, Chemical and Corporate and financing segment earnings (loss), and earnings (loss) per share are ExxonMobil's share after excluding amounts attributable to noncontrolling interests.

CURRENT ECONOMIC CONDITIONS

During the first quarter of 2020, the balance of supply and demand for petroleum and petrochemical products experienced two significant disruptive effects. On the demand side, the COVID-19 pandemic spread rapidly through most areas of the world resulting in substantial reductions in consumer and business activity and significantly reduced demand for crude oil, natural gas, and petroleum products. This reduction in demand coincided with announcements of increased production in certain key oil producing countries which led to sharp declines in prices for crude oil and other petrochemical products. Against this backdrop of economic uncertainty, global financial markets have experienced significant volatility and disruption, which at times has negatively impacted the efficiency of credit markets and available pools of liquidity.

In response to these conditions, the Corporation announced significant reductions in 2020 capital spending and operating expenses. Capital and exploration expenditures for 2020 are now expected to be \$23 billion, down from the previously announced \$33 billion. The Corporation's near-term reduction in capital expenditures has resulted in a downward revision to proved reserves estimates reported in the 2019 Form 10-K of approximately 1 billion oil-equivalent barrels, mainly related to unconventional drilling in the United States. Consequently, unit-of-production depreciation and depletion rates for Upstream assets will be higher beginning in the first quarter.

The Corporation also took additional actions to strengthen its liquidity including issuing \$8.5 billion of long-term debt securities in the first quarter of 2020 and issuing a further \$9.5 billion of long-term debt securities subsequent to the date of the financial statements as described in Note 7. In the first quarter of 2020, the Corporation established a short-term credit facility to provide an additional \$7.0 billion of borrowing capacity for general corporate purposes to supplement its existing short-term revolving credit facilities of \$7.9 billion as of year-end 2019. The majority of these credit facilities will expire within one year and may be renewed or replaced according to the Corporation's financing needs and business environment. As of March 31, 2020, no material amounts have been drawn on these facilities.

Should industry conditions near the end of the first quarter persist for an extended period into the future, the Corporation expects lower realized prices for its products to result in lower earnings and operating cash flow than in previous quarters. Amidst these conditions, project deferrals and idling of capacity will continue or may increase, and project cancellations could occur, resulting in lower volumes across one or more business segments. The capital spending reductions will result in lower near-term production volumes in the Upstream and delays in previously anticipated volume increases in future years. While the Corporation's view of long-term supply and demand fundamentals has not changed significantly, any future reduction in the range of its long-term price outlooks could put a significant portion of its long-lived assets at risk for impairment. However, due to the inherent difficulty in predicting future commodity prices, and the relationship between industry prices and costs, it is not practicable to reasonably estimate the existence or range of any potential future impairment charges related to the Corporation's long-lived assets.

As disclosed in ExxonMobil's 2019 Form 10-K, low crude oil and natural gas prices can impact the Corporation's proved reserves as reported under Securities and Exchange Commission (SEC) rules. Average year-to-date crude oil and natural gas prices have been significantly affected by the very low prices experienced near the end of the first quarter. If prices seen near the end of the first quarter persist for the remainder of the year, under the SEC definition of proved reserves, certain quantities of crude oil and natural gas will not qualify as proved reserves at year-end 2020. Since proved reserves estimates are affected by a number of factors including timing and completion of development projects, reservoir performance, market prices and differentials, costs, fiscal and commercial terms, government policies, regulatory approvals and partner considerations, it is not practicable to reasonably estimate the range of any potential future revisions to the Corporation's proved reserves for year-end 2020 reporting.

The Corporation has taken steps, in line with government guidelines and restrictions, to limit the spread of COVID-19 among employees, contractors and the broader community, while also maintaining operations to ensure reliable supply of products to customers. The Corporation maintains robust business continuity plans, but should these efforts not be successful the Corporation could experience declines in workforce productivity that exacerbate some of the adverse operating and financial effects noted above.

REVIEW OF FIRST QUARTER 2020 RESULTS

ExxonMobil's first quarter 2020 results were a loss of \$610 million, or \$0.14 per diluted share, compared with earnings of \$2.4 billion a year earlier. The decrease in earnings was primarily the result of unfavorable non-operational impacts and lower Upstream realizations. These impacts were partly offset by higher Downstream margins on favorable mark-to-market derivatives, reduced maintenance activity mainly in the Downstream, and Upstream volume growth. Unfavorable non-operational impacts reflected an inventory write-down and impairments, with further information provided in Note 2.

Oil-equivalent production was 4.0 million barrels per day, up 2 percent from the prior year. Excluding entitlement effects and divestments, oil-equivalent production was up 5 percent.

The Corporation distributed \$3.7 billion in dividends to shareholders.

	First Three Months

	(millions of	dollars)
<u>Upstream results</u>		
United States	(704)	96
Non-U.S.	1,240	2,780
Total	536	2,876

Upstream earnings were \$536 million in the first quarter of 2020, down \$2,340 million from the first quarter of 2019.

- · Realizations reduced earnings by \$2,020 million, with lower liquids realizations of \$1,370 million and lower gas realizations of \$650 million.
- Volume and mix effects increased earnings by \$220 million due to higher liquids volumes of \$290 million partly offset by lower gas volumes of \$70 million.
- All other items decreased earnings by \$540 million, mainly due to unfavorable non-operational impacts associated with impairments of \$360 million and an inventory write-down of \$260 million.
- U.S. Upstream results were a loss of \$704 million, down \$800 million from the prior year quarter.
- Non-U.S. Upstream earnings were \$1,240 million, down \$1,540 million from the prior year quarter.
- On an oil-equivalent basis, production increased 2 percent from the first quarter of 2019.
- Liquids production totaled 2.5 million barrels per day, up 153,000 barrels per day, with growth and lower downtime partly offset by divestments.
- Natural gas production was 9.4 billion cubic feet per day, down 528 million cubic feet per day, mainly driven by divestments and lower demand.

2020	4,046

First Onorton

(1) Natural gas is converted to an oil-equivalent basis at six million cubic feet per one thousand barrels.

Listed below are descriptions of ExxonMobil's volumes reconciliation factors which are provided to facilitate understanding of the terms.

Entitlements - Net Interest are changes to ExxonMobil's share of production volumes caused by non-operational changes to volume-determining factors. These factors consist of net interest changes specified in Production Sharing Contracts (PSCs) which typically occur when cumulative investment returns or production volumes achieve defined thresholds, changes in equity upon achieving pay-out in partner investment carry situations, equity redeterminations as specified in venture agreements, or as a result of the termination or expiry of a concession. Once a net interest change has occurred, it typically will not be reversed by subsequent events, such as lower crude oil prices.

Entitlements - Price, Spend and Other are changes to ExxonMobil's share of production volumes resulting from temporary changes to non-operational volume-determining factors. These factors include changes in oil and gas prices or spending levels from one period to another. According to the terms of contractual arrangements or government royalty regimes, price or spending variability can increase or decrease royalty burdens and/or volumes attributable to ExxonMobil. For example, at higher prices, fewer barrels are required for ExxonMobil to recover its costs. These effects generally vary from period to period with field spending patterns or market prices for oil and natural gas. Such factors can also include other temporary changes in net interest as dictated by specific provisions in production agreements.

Quotas are changes in ExxonMobil's allowable production arising from production constraints imposed by countries which are members of the Organization of the Petroleum Exporting Countries (OPEC). Volumes reported in this category would have been readily producible in the absence of the quota.

Divestments are reductions in ExxonMobil's production arising from commercial arrangements to fully or partially reduce equity in a field or asset in exchange for financial or other economic consideration.

Growth and Other factors comprise all other operational and non-operational factors not covered by the above definitions that may affect volumes attributable to ExxonMobil. Such factors include, but are not limited to, production enhancements from project and work program activities, acquisitions including additions from asset exchanges, downtime, market demand, natural field decline, and any fiscal or commercial terms that do not affect entitlements.

wnstream results			
United States	(101)	(161)	
Non-U.S.	(510)	(95)	
Total	(611)	(256)	

Downstream results were a loss of \$611 million in the first quarter of 2020, compared with a loss of \$256 million in the first quarter of 2019.

- Margins increased earnings by \$1,260 million, mainly reflecting favorable mark-to-market derivatives and higher margins on product sales.
- · Volume and mix effects increased earnings by \$390 million.
- All other items reduced earnings by \$2,010 million, mainly due to unfavorable non-operational impacts associated with an inventory write-down of \$1,600 million and impairments of \$340 million.
- U.S. Downstream results were a loss of \$101 million, compared with a loss of \$161 million in the prior year quarter.
- Non-U.S. Downstream results were a loss of \$510 million, compared with a loss of \$95 million in the prior year quarter.
- Petroleum product sales of 5.3 million barrels per day were 128,000 barrels per day lower than the prior year quarter.

and sales and returns of investments	86	107
Cash flow from operations and asset sales	6,360	8,445

First Three Months

Because of the ongoing nature of our asset management and divestment program, we believe it is useful for investors to consider proceeds associated with asset sales together with cash provided by operating activities when evaluating cash available for investment in the business and financing activities, including shareholder distributions.

Cash flow from operations and asset sales in the first quarter of 2020 was \$6.4 billion, including asset sales of \$0.1 billion, a decrease of \$2.1 billion from the comparable 2019 period primarily reflecting lower earnings and unfavorable working capital impacts. Current market conditions and the ability of counterparties to secure financing may negatively affect the pace of asset sales in 2020.

Cash provided by operating activities totaled \$6.3 billion for the first three months of 2020, \$2.1 billion lower than 2019. Net income including noncontrolling interests was a loss of \$0.8 billion, a decrease of \$3.2 billion from the prior year period. The adjustments for the noncash provisions were \$5.8 billion for depreciation and depletion and \$2.2 billion for the lower of cost or market inventory adjustment. Changes in operational working capital were a reduction of \$0.9 billion, compared to a contribution of \$2.3 billion in the prior year period. All other items net decreased cash flows by \$0.1 billion in 2020 versus a reduction of \$0.9 billion in 2019. See the Condensed Consolidated Statement of Cash Flows for additional details.

Investing activities for the first three months of 2020 used net cash of \$6.4 billion, an increase of \$0.6 billion compared to the prior year. Spending for additions to property, plant and equipment of \$5.9 billion was \$0.7 billion higher than 2019. Proceeds from asset sales of \$0.1 billion were comparable to the prior year. Investments and advances decreased \$0.2 billion to \$0.5 billion.

During the first quarter of 2020, the Corporation issued \$8.5 billion of long-term debt. Net cash provided by financing activities was \$8.8 billion in the first three months of 2020, \$9.8 billion higher than 2019 reflecting the 2020 debt issuance.

Total debt at the end of the first quarter of 2020 was \$59.6 billion compared to \$46.9 billion at year-end 2019. The Corporation's debt to total capital ratio was 24.0percent at the end of the first quarter of 2020 compared to 19.1 percent at year-end 2019.

During the first three months of 2020, Exxon Mobil Corporation purchased 6 million shares of its common stock for the treasury at a gross cost of \$0.3 billion. These purchases were made to offset shares or units settled in shares issued in conjunction with the company's benefit plans and programs. Shares outstanding decreased from 4,234 million at year-end to 4,228 million at the end of the first quarter of 2020. Purchases may be made both in the open market and through negotiated transactions, and may be increased, decreased or discontinued at any time without prior notice.

The Corporation retained access to significant capacity of long-term and short-term liquidity during the period despite challenging financial market conditions. Commercial paper continued to provide short-term liquidity despite brief periods of reduced investor demand. The balance of commercial paper outstanding was \$24.4 billion as of March 31, 2020. To provide increased liquidity and flexibility, the Corporation increased cash and cash equivalents by \$8.3 billion to \$11.4 billion during the first quarter of 2020. Additionally, in the first quarter of 2020, the Corporation established a short-term credit facility to provide an additional \$7.0 billion of borrowing capacity for general corporate purposes to supplement its existing short-term revolving credit facilities of \$7.9 billion as of year-end 2019. The majority of these credit facilities will expire within one year and may be renewed or replaced according to the Corporation's financing needs and business environment. As of March 31, 2020, no material amounts have been drawn on these facilities.

Short-term and long-term debt is used to cover cash needs in excess of internally generated funds. Under current economic conditions, the level of debt is expected to increase in the near-term. The Corporation's balance sheet strength and access to financial markets on attractive terms provide the capacity to continue investing in industry-advantaged projects to create value and preserve cash for the dividend. Management views the Corporation's financial strength as a competitive advantage and maintaining a competitive credit position is an important factor in balancing capital allocation priorities and determining the pace of investments.

The Corporation distributed a total of \$3.7 billion to shareholders in the first three months of 2020 through dividends.

The Corporation, as part of its ongoing asset management program, continues to evaluate its mix of assets for potential upgrade. Because of the ongoing nature of this program, dispositions will continue to be made from time to time which will result in either gains or losses. Additionally, the Corporation continues to evaluate opportunities to enhance its business portfolio through acquisitions of assets or companies, and enters into such transactions from time to time. Key criteria for evaluating acquisitions include potential for future growth and attractive current valuations. Acquisitions may be made with cash, shares of the Corporation's common stock, or both.

Litigation and other contingencies are discussed in Note 3 to the unaudited condensed consolidated financial statements.

TAXES

	First Three M	First Three Months	
	2020	2019	
	(millions of dollars)		
Income taxes	512	1,883	
Effective income tax rate	481 %	53 %	
Total other taxes and duties (1)	7,497	8,087	
Total	8,009	9,970	

(1) Includes "Other taxes and duties" plus taxes that are included in "Production and manufacturing expenses" and "Selling, general and administrative expenses."

Total taxes were \$8.0 billion for the first quarter of 2020, a decrease of \$2.0 billion from 2019. Income tax expense decreased by \$1.4 billion to \$0.5 billion reflecting lower pre-tax income resulting from lower commodity prices. The effective income tax rate of 481 percent compared to 53 percent in the prior year period primarily due to a change in mix of earnings in jurisdictions with varying tax rates. The change in mix of earnings was primarily driven by inventory valuation and impairment impacts. Total other taxes and duties decreased by \$0.6 billion to \$7.5 billion.

In the United States, the Corporation has various ongoing U.S. federal income tax positions at issue with the Internal Revenue Service (IRS) for tax years beginning in 2006. The Corporation filed a refund suit for tax years 2006-2009 in U.S. federal district court with respect to the positions at issue for those years. On February 24, 2020, the Corporation received an adverse ruling on this suit and is assessing the ruling. Unfavorable resolution of all positions at issue with the IRS would not have a materially adverse effect on the Corporation's net income or liquidity. The IRS has asserted penalties associated with several of those positions. The Corporation has not recognized the penalties as an expense because the Corporation does not expect the penalties to be sustained under applicable law.

CAPITAL AND EXPLORATION EXPENDITURES

	First Three	First Three Months	
	2020	2019	
	(millions of	dollars)	
Upstream (including exploration expenses)	5,126	5,361	
Downstream	1,234	829	
Chemical	782	696	
Other	1	4	
Total	7,143	6,890	

Capital and exploration expenditures in the first quarter of 2020 were \$7.1 billion, up 4 percent from the first quarter of 2019. The Corporation anticipates an investment level of \$23 billion in 2020, down from the previously announced \$33 billion. Actual spending could vary depending on the progress of individual projects and property acquisitions.

FORWARD-LOOKING STATEMENTS

Statements related to outlooks, projections, goals, targets, descriptions of strategic plans and objectives, and other statements of future events or conditions are forwardlooking statements. Actual future results, including financial and operating performance, the impact of the COVID-19 pandemic on results; planned capital and cash operating expense reductions; total capital expenditures and mix; cash flow, dividend and shareholder returns; business and project plans, timing, costs and capacities; resource recoveries and production rates; accounting effects resulting from market developments and ExxonMobil's responsive actions; and the impact of new technologies, including to increase capital efficiency and production and to reduce greenhouse gas emissions, could differ materially due to a number of factors. These include global or regional changes in the supply and demand for oil, natural gas, petrochemicals, and feedstocks and other market conditions that impact prices and differentials; the outcome of government policies and actions, including actions taken to address COVID-19 and to maintain the functioning of national and global economies and markets; the impact of company actions to protect the health and safety of employees, vendors, customers, and communities; actions of competitors and commercial counterparties; the ability to access short- and long-term debt markets on a timely and affordable basis; the severity, length and ultimate impact of COVID-19 on people and economies; reservoir performance; the outcome of exploration projects and timely completion of development and construction projects; changes in law, taxes, or regulation including environmental regulations, and timely granting of governmental permits; war, trade agreements and patterns, shipping blockades or harassment, and other political or security disturbances; opportunities for and regulatory approval of potential investments or divestments; the actions of competitors; the capture of efficiencies between business lines; unforeseen technical or operating difficulties; unexpected technological developments; the ability to bring new technologies to commercial scale on a costcompetitive basis, including large-scale hydraulic fracturing projects; general economic conditions including the occurrence and duration of economic recessions; the results of research programs; and other factors discussed under the heading Factors Affecting Future Results on the Investors page of our website at www.exxonmobil.com and in Item 1A of ExxonMobil's 2019 Form 10-K. We assume no duty to update these statements as of any future date.

The term "project" as used in this report can refer to a variety of different activities and does not necessarily have the same meaning as in any government payment transparency reports.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information about market risks for the three months ended March 31, 2020, does not differ materially from that discussed under Item 7A of the registrant's Annual Report on Form 10-K for 2019.

Item 4. Controls and Procedures

As indicated in the certifications in Exhibit 31 of this report, the Corporation's Chief Executive Officer, Principal Financial Officer and Principal Accounting Officer have evaluated the Corporation's disclosure controls and procedures as of March 31, 2020. Based on that evaluation, these officers have concluded that the Corporation's disclosure controls and procedures are effective in ensuring that information required to be disclosed by the Corporation in the reports that it files or submits under the Securities Exchange Act of 1934, as amended, is accumulated and communicated to them in a manner that allows for timely decisions regarding required disclosures and are effective in ensuring that such information is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. There were no changes during the Corporation's last fiscal quarter that materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

As reported in the Corporation's Form 10-Q for the second quarter of 2006, the State of New York Attorney General (AG) sued a number of parties, including ExxonMobil, in New York state court, Albany County, seeking penalties relating to an alleged discharge of petroleum at a Mobil-branded service station in Uniondale, New York. The suit (captioned "State of New York v. United Gas Corp. et al.") alleged that the discharge has impacted soil and groundwater in the vicinity of the service station. The AG and the seven defendants agreed to settlement terms in January 2020. The settlement includes a payment of \$3.2 million by ExxonMobil and the completion of remediation work by one of the other defendants. No civil penalties were assessed for ExxonMobil or the other defendants.

Regarding a matter last reported in the Corporation's Form 10-K for 2019, on December 31, 2019, the United States Federal District Court, Northern District of Texas (the Federal Court), vacated the civil penalty assessed by the United States Department of Treasury, Office of Foreign Assets Control (OFAC) against Exxon Mobil Corporation, ExxonMobil Development Company and ExxonMobil Oil Corporation on July 20, 2017, for allegedly violating the Ukraine-Related Sanctions Regulations, 31 C.F.R. part 589. The civil penalty vacated by the Federal Court was in the amount of \$2,000,000. On April 8, 2020, OFAC and the U.S. Department of Justice confirmed that the U.S. Federal Government will not seek an appeal of the Federal Court's final judgment vacating the penalty issued by OFAC against the Corporation.

Refer to the relevant portions of Note 3 of this Quarterly Report on Form 10-Q for further information on legal proceedings.

Item 1A. Risk Factors

The risk factors that are discussed in Item 1A of the registrant's Annual Report on Form 10-K for 2019, including those risk factors in respect of commodity supply and demand and public health, encompass, among other things, current market conditions of production oversupply as well as demand reduction due to the COVID-19 pandemic which has led to a significant decrease in commodity prices. Our future business results, including cash flows and financing needs, will be affected by the extent and duration of these conditions and the effectiveness of responsive actions that we and others take, including our actions to reduce capital and operating expenses and government actions to address the COVID-19 pandemic, as well as any resulting impact on national and global economies and markets. At this time, it is difficult to predict the timing of any resolution of the current supply imbalances and the ultimate impact of COVID-19, and we continue to monitor market developments and evaluate the impacts of decreased demand on our production levels, as well as impacts on project development and future production.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchase of Equity Securities for Quarter Ended March 31, 2020

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
January 2020	1,775,929	\$67.55	1,775,929	
February 2020	1,760,540	\$58.75	1,760,540	
March 2020	2,038,531	\$39.88	2,038,531	
Total	5,575,000		5,575,000	(See Note 1)

Note 1 - On August 1, 2000, the Corporation announced its intention to resume purchases of shares of its common stock for the treasury both to offset shares issued in conjunction with company benefit plans and programs and to gradually reduce the number of shares outstanding. The announcement did not specify an amount or expiration date. The Corporation has continued to purchase shares since this announcement and to report purchased volumes in its quarterly earnings releases. In its earnings release dated February 2, 2016, the Corporation stated it will continue to acquire shares to offset dilution in conjunction with benefit plans and programs, but had suspended making purchases to reduce shares outstanding effective beginning the first quarter of 2016.

Item 6. Exhibits

Exxon Mobil Corporation 5959 Las Colinas Boulevard Irving, Texas 75039-2298

EXXON MOBIL CORPORATION

Non-Employee Director Compensation

March 1, 2020

At a meeting of the Board of Exxon Mobil Corporation, duly called and held at 5959 Las Colinas Boulevard, Irving, Texas, on February 26, 2020, at which a quorum was present and voting, the following resolution was presented and, on motion made and seconded, duly adopted:

RESOLVED, that, effective March 1, 2020, each member of the Board of Directors who is not an employee of the Corporation or of any of its affiliated companies (a "non-employee director") be compensated at the rate of \$110,000 per annum, and that in addition,

- a) each non-employee director designated as Chair of the Audit Committee or Chair of the Compensation Committee be compensated at the rate of \$10,000 per annum;
- b) the non-employee director designated as Lead Director be compensated at the rate of \$50,000 per annum; and
- c) non-employee directors receive no additional fees for serving on, or attending regular or special meetings of, the Board or any committee of the Board, or for execution of written consents to action in lieu of meetings of the Board or any such committee, but be reimbursed for reasonable expenses if any; and that the resolutions regarding non-employee director remuneration adopted by the Board of Directors on October 26, 2011 be, and hereby are, revoked.

Certification by Darren W. Woods Pursuant to Securities Exchange Act Rule 13a-14(a)

I, Darren W. Woods, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Exxon Mobil Corporation;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Certification by Andrew P. Swiger Pursuant to Securities Exchange Act Rule 13a-14(a)

I, Andrew P. Swiger, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Exxon Mobil Corporation;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
