NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS:

These condensed consolidated financial statements should be read in the context of the consolidated financial statements and notes there to filed with the S.E.C. in the corporation's 1993 Annual Report on Form 10-K. In the opinion of the corporation, the information furnished herein reflects all known accruals and adjustments necessary for a fair statement of the results for the periods reported herein. All such adjustments are of a normal recurring nature. The corporation's exploration and production activities are accounted for under the "successful efforts" method.

Chemicals		
United States	92	87
Non-U.S.	57	36
Other operations	58	48
Corporate and financing	(270)	(180)
NET INCOME	\$1,160	\$1,185

FIRST QUARTER 1994 COMPARED WITH FIRST QUARTER 1993

Exxon Corporation estimated first quarter 1994 net income at \$1,160 million, or \$0.92 per share, compared with \$1,185 million, or \$0.94 per share, in the same period last year.

Despite the continued weakness in worldwide crude prices, Exxon earned nearly \$1.2 billion in the first quarter, down only 2 percent from the first quarter of 1993. Sales volumes increased in each of Exxon's major business segments and petroleum product and chemical margins improved.

During the quarter, crude prices were on average lower than they have been in over five years. While this negatively impacted worldwide exploration and producing earnings, stronger natural gas earnings provided a partial offset, particularly in the United States where Exxon benefited from improved gas market conditions and increased volumes from several new field developments.

Earnings in the refining and marketing segment improved due to increased sales volumes and stronger margins. This improvement was achieveddespite unusually high refinery maintenance activity in the quarter.

Chemical earnings also rose as a modest improvement in economic conditions in major markets led to increased demand and better margins.

EXXON CORPORATION

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

OTHER COMMENTS ON FIRST QUARTER COMPARISON

During the first quarter 1994, worldwide production earnings were negatively impacted by crude prices which on average were over \$4.00 per barrel below the prior year. Earnings from exploration and production operations outside the U.S. totaled \$590 million, compared with \$668 million in the year ago period. Earnings from U.S. exploration and production operations were \$245 million in the first quarter of 1994, up from \$228 million in the first quarter 1993 reflecting the improved natural gas market and lower operating expenses.

Crude production in the first quarter 1994 was 1,749 kbd (thousand barrels per day) up from 1,676 kbd the prior year. The increase resulted from higher production from operations in the North Sea and Alaska. Worldwide natural gas production of 7,294 mcfd (million cubic feet per day) rose 3 percent in the first quarter 1994 compared to the same period last year reflecting stronger demand and new production from operations in the U.S. and Malaysia.

Earnings from U.S. refining and marketing operations were \$39 million in the first quarter 1994, up from \$21 million in the first quarter 1993 despite sharply higher scheduled refinery maintenance activities this year. Earnings from refining and marketing operations outside the U.S. were \$349 million in the most recent quarter, compared with \$277 million in the first quarter 1993. In comparison to the prior year period, petroleum product margins strengthened as lower crude supply costs more than offset the effect of lower product prices. Worldwide petroleum product sales volumes of 4,994 kbd rose from 4,870 kbd in the first quarter of last year, due principally to increases in Europe, Canada, and Latin America.

First quarter 1994 earnings from worldwide chemical operations

totaled \$149 million, up from \$123 million in the first quarter last year. Earnings benefited from increased demand and improved margins. Product sales volumes of 3,268 kt (thousands tons) were up from 3,211 kt last year.

Earnings from other operating segments were \$58 million, up from \$48 million in the first quarter 1993.

Corporate and financing expenses of \$270 million compared with \$180 million in the first quarter of last year, with the increase due primarily to foreign exchange fluctuations.

Net income in the first quarter 1994 of \$1,160 million included a net credit of \$66 million from tax rate changes and asset dispositions, while the first quarter of the prior year included \$47 million of similar credits.

-7-

EXXON CORPORATION

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Net cash generation before financing activities was \$1,798 million in the first three months of 1994 versus \$1,708 million in the same period last year. Operating activities provided net cash of \$2,363 million, a decrease of \$249 million from 1993's first three months, influenced mainly by a change in operational working capital. Investing activities used net cash of \$565 million, or \$339 million less than a year ago primarily due to higher proceeds from asset dispositions.

Net cash used in financing activities was \$1,111 million in the first quarter of 1994 versus \$1,498 million in the same quarter last year. The decrease mainly reflects the absence of the redemption of preferred securities by an affiliate in the year ago period. Net outlays for treasury share acquisitions were \$48 million, essentially unchanged from the prior year quarter. During the first quarter of 1994, a total of 1.3 million shares were acquired at a cost of \$86 million. Purchases are made in both the open market and through negotiated transactions. Purchases may be discontinued at any time.

Capital and exploration expenditures of \$1,577 million in the first quarter 1994 were essentially unchanged from the amount invested in the first quarter of 1993. Current plans indicate capital and exploration expenditures in 1994 will be about equal to the prior year as Exxon continues to maintain its active investment program.

Total debt of \$12.6 billion at March 31, 1994 was level with the total debt at year-end 1993. The corporation's debt to total capital ratio was 25.1 percent at the end of the first quarter of 1994, down from 25.3 percent at year-end 1993.

Over the twelve months ended March 31, 1994, return on average shareholder's equity was 15.2 percent. Return on average capital employed, which includes debt, was 12.1 percent over the same time period.

Although the corporation accesses financial markets from time to time, internally generated funds cover a significant portion of its financial requirements.

The corporation, as part of its ongoing asset management program, continues to evaluate its mix of assets for potential upgrade. Because of the ongoing nature of this program, dispositions will continue to be made from time to time which will result in either gains or losses.

PART II - OTHER INFORMATION

EXXON CORPORATION

FOR THE QUARTER ENDED MARCH 31, 1994

Item 1. Legal Proceedings

As previously reported, a number of lawsuits, including class actions, have been brought in various courts against Exxon Corporation and certain of its subsidiaries relating to the release of crude oil from the tanker Exxon Valdez in 1989. Most of these lawsuits seek unspecified compensatory and punitive damages; several lawsuits seek damages in varying

specified amounts. The claims of many individuals have been dismissed or settled. For most of the remaining actions, trial in federal court commenced on May 2, 1994. Other actions are scheduled for trial in state court commencing June 6, 1994. The cost to the corporation from these lawsuits is not possible to predict; however, it is believed that the final outcome will not have a materially adverse effect upon the corporation's operations or financial condition.

On August 23, 1993, the U.S. Environmental Protection Agency ("EPA") issued a notice to Exxon Chemical Company alleging violation of certain new source performance standards under the Clean Air Act applicable to a volatile organic compound storage tank. The EPA has not yet proposed a specific penalty.

In March 1994, a settlement was reached with respect to a lawsuit brought on October 16, 1992 in the Superior Court of the State of California for the County of Solano by the Western States Petroleum Association, Exxon Company, U.S.A., and five other Bay Area refiners against the San Francisco Regional Water Quality Control Board ("RWQCB") and the State Water Resources Control Board. The suit challenged the addition by the RWQCB of certain final selenium discharge limitations to Bay Area refinery permits. The terms of the settlement, which were embodied in anadministrative order of the RWQCB, included a postponement of the effectiveness of the final limitations, as well as Exxon's agreement to pay an aggregate of \$180,000 over two years into the State selenium mitigation and water pollution cleanup and abatement funds.

Item 6. Exhibits and Reports on Form 8-K
