Underlying all this is the effect of zero rates and growing govt heft in the economy (with Covid giving the latest boost). This saved the oil market in 2020 but is also eating away at its foundations:

"Beneath the sheer symbolism of **ExxonMobil** Corp.'s fall from the Dow Industrials alongside **Tesla** Inc.'s catapult into the S&P 500 lurks an existential problem for the oil and gas sector. Despite its incumbency, investors aren't really buying the 90-million-barrels thesis and have been demanding their money back (or turning activist)."
