The world is changing when it comes to energy & ExxonMobil needs to change with it. Over the last 4 years, Exxon's stock was down 54% while leadership ignored the transition to a decarbonized world, & the S&P 500 increased 68%. During the same time, the CEO earned \$75 million.

Over the last 4 years, ExxonMobil's stock was down 54% and leadership failed to prepare Exxon to create value in a rapidly decarbonizing world. All while the CEO earned \$75M.
