I am beyond excited for my new role as president of ExxonMobil Low Carbon Solutions, a business dedicated to reducing carbon emissions through innovative technologies. This is a huge step forward for ExxonMobil, building on 30 years of industry leadership in carbon capture and storage (CCS).

I've been a chemical engineer for the same amount of time, and science and safety are the basis of everything I do. Through collaboration across industry and government, our team of experts will work to progress key technologies like CCS that are critical to achieving net zero emissions and the climate goals outlined in the Paris Agreement. I look forward to helping advance ambitious, impactful solutions for the energy industry and the world. More to come – stay tuned.
