**CalPERS Shareholder Vote
Media Response Statement
April 2021**

We value our relationship with CalPERS' both as a shareholder and leader within the Climate Action 100+ advocacy group. We share with CalPERS a strong focus on finding solutions to address the risks of climate change.

Throughout this year, we have engaged with CalPERS and other members of Climate Action 100+ on multiple occasions to better understand their disclosure needs, and have increased our disclosures in response to their requests. These increased disclosures have included an estimate of customer emissions from the use of our products, known as Scope 3 emissions. We will continue to engage with our shareholders, including CalPERS, to discuss our clear strategy for succeeding in a lower-carbon future.

ExxonMobil is focused on meeting energy demand while developing technologies and commercializing opportunities to tackle emissions and enhance shareholder value in an energy transition. A recent example is our game-changing, multi-industry carbon capture and storage hub concept for the Houston ship channel to effectively decarbonize one of the country's largest sources of emissions by 2040. We believe this type of large-scale emission-reduction approach is needed to meet society's goals consistent with the Paris Agreement, which we've supported from its inception. We continue to value input from all our shareholders.
